## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 7-13,15-24 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art fails to show a pressing member that is disposed between the pinion and the step of the pinion shaft for pressing the pinion toward the restricting member relative to the pinion shaft and in combination with the pinion movable toward the step of the pinion shaft while compressing the pressing member up to a position at which the rear end surface of the pinion and the step of the pinion shaft come into direct contact with each other. Prior art also fails to show a pressing member disposed between a rear end portion of the pinion and the rising wall of the step, wherein the pressing member normally presses the pinion in a direction away from the first end of the pinion shaft and wherein the rear end surface of the pinion is brought into contact with the rising wall of the step while compressing the pressing member when the pinion contacts a ring gear for starting an engine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
